

J T BEVANN DRYLINING SPECIALISTS LIMITED

METHOD STATEMENT

COMPANY:

LOCATION:

OPERATION: JOINTING

Materials:

- All jointing materials delivered to site on pallets and distributed into units and stored in a safe and dry manner.

Application:

- All joint materials will be mixed with clean water taking precaution against all hazardous effects by using gloves and dust masks and in a ventilated area.
- Beads and Corner Tapes to be cut to length and fixed to external corners with Joint Filler and coated with Joint Cement, left to dry and sanded.
- Jointing to Plasterboard walls and ceilings to be carried out by experienced operatives using Ames Jointing Machines and hand tools i.e. hawks, trowels, taping knives and snips.
- Joints to plasterboard will be mechanically taped and filled using the Ames Machine method and when dry shall be sanded and left ready for decoration.
- All waste materials and empty bags to be placed in bags or skips provided by Main Contractor.
